

**AMENDMENTS TO THE SPECIFICATION**

Please amend the paragraph beginning on page 34, line 24 as follows:

The coupling between the motor and the door is designed to allow the motor to be de-coupled ~~from~~ from the door in order to enable movement of the door without causing damage to the motor, mechanism or excessive resistance to motion. Various ways for constructing the motor and door to achieve this purpose would be readily ascertainable by one skilled in the art in view of the disclosure herein.
